# Tetiana Chuiko

## Product Designer · design systems, UX/UI audits, design engineering

hi@tetianachuiko.com · **Portfolio:** tetianachuiko.com · linkedin.com/in/tetiana-chuiko · Upwork: Top Rated · Krakow, Poland

### PROFILE

Product designer with 7+ years in web and mobile. I turn complex, messy requirements into clear products and build the design systems that keep them consistent. I work directly with stakeholders and developers, from research and UX audits to handoff and design QA. I also do design engineering: I take designs into code myself with AI tools.

### EXPERIENCE

**Contract & Self-employed** · Product Designer — Sep 2024 – Present · Remote

- Product design for startups, established businesses and non-profits, through Upwork and direct clients: full-cycle apps, UX audits, UI refreshes and landing pages. Top Rated on Upwork with 100% Job Success.
- Weather Fit, our own iOS app with 649K+ downloads: product and UI design, localization and the website, which raised App Store clicks per homepage view by 56%.
- Design engineering with Claude Code: I design and build websites and change existing products directly in code.

**Nerdz Lab** · Product Designer — Jun 2021 – Sep 2024 · Lviv

- Led design from discovery to QA after development, working on my own inside client teams on outstaff projects.
- Designed a free mental health app for veterans and their families on iOS and Android: information architecture, user flows, light and dark UI and a design system. 10,000+ downloads, rated 4.8 on the App Store and 5.0 on Google Play.
- Ran usability tests in Maze before development and changed the designs based on the results.
- Standardised the company templates for UX audits, reports and case studies, including templates the marketing team could update on their own.
- Worked on the company's own products and interviewed candidates for design roles.

**LaSoft** · Product Designer — Jun 2020 – Jun 2021 · Lviv

- Designed web and mobile products for startups and established companies, often as an outstaff designer inside the client's team.
- Presented and explained design solutions to clients and stakeholders.
- Worked with engineers, PMs and business analysts through the whole process: answered design questions, added what they needed and fixed critical usability issues.

**KindGeek** · UI/UX Designer — Feb 2018 – Jan 2020 · Lviv

- Designed web and mobile interfaces for startups and the company's own products, from wireframes to final UI.
- Created marketing materials and supported pre-sale estimates and developer handoff.

### SKILLS AND TOOLS

**Design systems:** built from scratch and refactored, design tokens, Figma variables, components, developer handoff

**UX:** wireframes, user flows, information architecture, prototyping, UX/UI audits, heuristic evaluation, competitor research

**Testing and data:** usability testing in Maze, A/B testing, product analytics in Mixpanel

**Interface design:** iOS, Android and web, responsive layouts, WCAG accessibility, design QA

**Tools and process:** Figma, Claude Code, Mixpanel, Maze, AI tools in the design process, Agile and Scrum

### EDUCATION

**IT Education Academy**, UI Design Course
Jun – Aug 2017 · Lviv

**Ivan Franko National University of Lviv**
Ukrainian Language and Literature · 2014 – 2018
